

MAHMOUD ELSAYED ABDEEN ELRAWI

Senior IT Support Specialist | Technical Support Engineer | Network & Telecom Operations

Location: Qena, Egypt | Phone: +20 10 67853308 | Email: katousabdeen@gmail.com | LinkedIn: linkedin.com/in/mahmoud-abdeen-a4476038b

Nationality: Egyptian | Work Authorization: Open to International Relocation (Requires Employer Visa Sponsorship)

PROFESSIONAL SUMMARY

Results-driven Technical Support Engineer and IT Support Specialist with over 5 years of progressive experience across enterprise IT environments, international customer operations, and major telecommunications infrastructure. Proven expertise in multi-platform system administration (Windows, macOS, Active Directory, Azure AD), end-to-end network connectivity troubleshooting (TCP/IP, DNS, DHCP, VPN, Router/Switch configuration), and telecom broadband operations (ADSL/VDSL, Fiber, Fixed Line, SELT diagnostics). Experience spans delivering tier-1/tier-2 remote IT support for 200+ international remote workers across Europe and the GCC at Orange Business Services, leading technical operations teams at Telecom Egypt (WE), and performing field service activation at Vodafone Egypt. Experienced in utilizing ITIL service management frameworks, ServiceNow, Jira, and telecom BSS/OSS suites to drive high customer satisfaction, optimize ticket resolution, and resolve complex technical escalations.

CORE TECHNICAL SKILLS

IT Support & Systems: Windows 10/11, Windows Server, macOS, Active Directory, Azure AD, User Accounts & Permissions, Group Policy (GPO), Hardware/Software Diagnostics, Remote Support, ITIL 4 Framework.

Networking & Connectivity: TCP/IP, DNS, DHCP, VPN, LAN/WAN, Wi-Fi Configuration, Router & Switch Configuration, VLAN Fundamentals, Port Forwarding, Connectivity Diagnostics.

Telecom & Broadband: Fixed Line, ADSL/VDSL, Broadband, Fiber Optics, VoIP, DSL Diagnostics, SELT (Single-Ended Line Testing), SNR, Line Attenuation, Sync Speed, Line Errors.

Telecom Platforms: ServiceNow, Jira, Customer360, Matrix, Assia (DSL Diagnostic Suite), TTS (Trouble Ticketing System), BSS, CRM.

Service Operations: Incident Management, SLA Management, Technical Ticket Lifecycle, Work Order Execution, Technical Escalation Management, Onsite Activation.

Web & Database Fundamentals: Domain Registration & DNS Setup, Web Hosting Configuration, Basic Website Deployment, Basic SQL Querying, Website Database Troubleshooting.

Technical Fundamentals: Linux Fundamentals, Microsoft Azure Fundamentals (AZ-900), AWS Fundamentals (In Progress), PowerShell Fundamentals, Python Fundamentals, HTML/CSS, Basic Cybersecurity.

PROFESSIONAL EXPERIENCE

Technical Support Representative (Field Service Activation & Onsite Technical Support) Jan 2026 – Present
Vodafone Egypt — Qena, Egypt

- Execute company-issued work orders for residential and commercial customers, performing on-site technical visits to ensure complete service deployment and connectivity.
- Complete required customer contracts and administrative documentation accurately prior to hardware installation and service turn-up.
- Deliver, position, and physically install customer premises equipment (CPE), including broadband routers, access points, and terminal hardware.
- Perform end-to-end broadband service activation procedures, configuring router settings, WAN/LAN interfaces, and wireless credentials.
- Leverage technical telecom diagnostic background to troubleshoot physical and logical connectivity issues at customer premises, verifying full operational stability before work order closure.

Team Leader – Technical Operations Jun 2022 – Jan 2026
Telecom Egypt (WE) — Qena, Egypt

- Led technical operations and escalated support workflows across Fixed Line, Internet, Broadband (ADSL/VDSL), Fiber, and VoIP services.
- Mentored and coached junior technical support agents on advanced connectivity troubleshooting, line diagnostics, and customer interaction standards.
- Performed deep-dive line diagnostics using Single-Ended Line Testing (SELT / Run SELT) to evaluate Signal-to-Noise Ratio (SNR), line attenuation, synchronization speed, DSL status, service profiles, and line error logs.
- Utilized **Assia** diagnostic software for broadband performance analysis, **Customer360** for account investigations, **Matrix** for service operations, **TTS** for trouble ticket tracking, **BSS** for service requests, and **CRM** for account provisioning.
- Managed fixed-line activation and reactivation workflows, resolving complex account suspension issues following billing reconciliation via CRM.
- Executed provisioning and request handling for specialized fixed-line services, including 0900 premium lines and commercial fax configurations.
- Collaborated directly with tier-3 network engineering teams during widespread regional service outages affecting 1,000+ end-users, coordinating incident tracking and rapid resolution.
- Resolved end-user network configuration challenges involving customer routers, DNS resolution, DHCP pools, TCP/IP parameters, and VPN connections.
- **Key Achievement:** Identified a critical billing-module operational bottleneck within CRM/BSS, developing an optimized workflow that saved 10+ hours of manual administrative work per week.

Senior Customer Service Agent
Telecom Egypt (WE) — Qena, Egypt

Mar 2022 – Jun 2022

- Provided technical support for residential customers encountering faults across Fixed Line, ADSL/VDSL Broadband, and VoIP infrastructure.
- Conducted customer-facing troubleshooting protocols to isolate issues related to local wiring, router configurations, and authentication failures.
- Utilized enterprise CRM and BSS platforms to retrieve subscriber profile data, audit service statuses, and initiate service modification requests.
- Logged, classified, and managed technical trouble tickets and Service Requests within the internal ticketing environment.
- Supported fixed-line activation and reactivation processes, facilitating smooth transition of suspended customer lines back into active status.
- Escalated complex physical line faults and equipment failures to field engineering and technical operations teams, maintaining ownership through resolution.

IT Support Specialist
Orange Business Services — Qena, Egypt

Jan 2021 – Feb 2022

- Delivered remote IT support and service desk assistance to international enterprise clients across Europe and the GCC region.
- Supported over 200 remote workers in multi-platform environments containing Windows 10/11 and macOS operating systems.
- Administered user accounts, group memberships, elevated permissions, and security policies within Active Directory (AD) and Azure Active Directory (Azure AD).
- Troubleshoot network layer issues impacting remote connectivity, resolving client DNS assignment errors, DHCP lease failures, and VPN gateway connection drops.
- Utilized **ServiceNow** for end-to-end incident logging, ticket categorization, SLA monitoring, and resolution documentation, utilizing **Microsoft Teams** for user communication.
- Performed initial hardware and software diagnostic routines, escalating specialized server and infrastructure tickets to appropriate tier-3 teams.
- **Key Achievement:** Recognized as **Employee of the Month twice** for operational excellence while consistently maintaining a **98% customer satisfaction rating**.

EDUCATION

South Valley University — Qena, Egypt
Bachelor's Degree in Public Law

2015 – 2020

**Technical qualifications and proficiency established through industry certifications, hands-on enterprise IT support experience, and multi-year telecom operations leadership.*
